******NEXT MEETING******

Monday, Jan. 12, 7:00 PM at the
JA building, 330 Collins Road NE.

SPECIALS INTEREST:

We will be covering word processing
Multiplan and some of the group
software.

Come and join us for a change of
program experiment.

See additions later in the news-
letter.

******FUTURE MEETING DATES******

Please mark the following dates on
your calendar for future meetings:
JANUARY 12, FEBRUARY 9, MARCH 9.

******CV99'er UG OFFICERS******

President: Jim Green
288 Windsor Drive NE
Cedar Rapids, Iowa 52402
377-4073 (Home) or
395-1898 (Office)

Vice President: Bruce Winter
702 Fernwood Dr. NE
Cedar Rapids, Iowa 52402
393-0610

Secretary: Gary Bishop
860 Westview Dr.
Marion, Iowa 52302
377-9574

Treasurer: Ed Hayek
3864 Lost Valley Rd. SE
Cedar Rapids, Iowa 52403
366-4793

Chairpersons:

Program: Dave Dalton
920 Hillview Dr.
Marion, Iowa 52302
377-1715

Publicity: Paul Mortensen
3179 Country Park Dr.
Toddville, Iowa
393-6022

Education: James Trainor
6013 Langdon Ave. SW
Cedar Rapids, Iowa
396-2270

****MINUTES FROM DEC MEETING****

26 people braved the slush and fog to attend the December 8, 1986 meeting which was called to order at 7:07 PM by Jerry Canady. The president is in China and Vice President Bruce Winter had laryngitis. The minutes as published in the newsletter were approved. The treasurer's report was read and approved. The silent auction to be held was explained and a cutoff time of 8:00 was set. The auction included power supplies, modulator, cartridges, and a Comuserve starter kit. The present membership numbers were discussed.

New business - Jim Trainor is willing to teach a class, contact an officer for interest in a class and the language desired. Discussion on ways to attract more members to the meetings. Special interest groups in Multiplan, TI Writer, Forth and hardware were mentioned. Interest in disk utilities, freeware exchange and having the group software library available was noted. The possibility of a tutorial on one freeware program a month and/or being available at 6:30 for tutorials or assistance was discussed. Steve Paxton, Ed Edwards and Bruce Winter volunteered to have systems available at the next meeting. We will see how special interests work out in lieu of the formal demonstration normally held. March elections for officers to take over in May was noted. A secretary to fill out Gary Bishops term has been found. Our thanks to Bill Paeth for volunteering. Jerry Canady requested that articles for the newsletter need to be in by the coming weekend to allow sufficient time for printing prior to the holiday season. Jerry noted that he has a modem and articles may be transferred by phone if desired.

The program for the evening was Christmas music and graphics from the clubs software library. Announcement of the availability of this Christmas disk for \$3.00 and 3 copies of the MAX-RLE program for \$1.00. That this program is public domain was discussed.

Old business - None was noted.

Misc. discussions - Mike Bonifazi is interested in writing adventure style programs and requested help related to structure and content. If anyone has information please contact Mike. Moving Adventure programs from tape to disk with the Tunnels Of Doom module was discussed. GROM port adapter (cartridge plug) availability from TI for approximately \$6.00 with a one week delivery time was noted. Steve Paxton requested tech. data for the computer. Gary Bishop noted he had the information. Steve is also looking for the Zork series adventure games. Contact Steve. Ed Edwards is looking for FEB and drive. The IUG software is in the compilation of listing process.

-Submitted by Gary Bishop, Secretary.

MEMBERSHIP RENEWAL NOTICE:

The groups bylaws require a continuation of newsletter mailings for the first 3 months of the new year. If you have not renewed your membership you will receive 1 more newsletter. So please bring your renewal to the next meeting or mail it to the address on the reverse of the membership form published in the October newsletter.

JANUARY MEETING ADDITIONS:

There will be three corners set up for special interest endeavors. They will be set up for word processing, Multiplan and a review of club/other software. This is intended to be a work/help environment that allows you to pick your area of interest.

Please remember those of us who are attempting to lead these sessions are not professing to be the ultimate-experts but are very willing to attempt to find solutions or pass on what tips we can. Bring your problems or desires and see if the group can find an answer.

I will bring several word processing programs so we can explore their advantages and limitations. If your printer is not an Epson/Star type control bring your manual and we will work out the proper codes to use for your printer control.

Check your software library list to see if there is a program you would like to explore. Bruce will have the library there. With luck some of the newest may be cataloged for your review.

Come and join in a fun learning experience.

FOR SALE/TRADE/WANTED:

This section of the newsletter is available at no charge for your classified advertisements. I would appreciate a call if you have completed a transaction or wish your item listed for more than one month.

12" amber Gorilla monitor (\$40). Terry Randall (319) 363-7631.

Console, cassette cable and adapter, extra modulator, 32 tapes of programs, XB and manual, console cover, \$100. Jerry Fitzgerald (319) 396-3337

I am interested in The Smart Programming Guide for Sprites book from Millers Graphics. If anyone has this book I would be interested in borrowing or buying it from you, if you want to swap for it at the next meeting that would be fine too. M. Bonifazi

TI-99/4A console with Extended Basic, \$65. Jerry Cerny (319) 393-0873

I am looking for technical/maintenance information on QUME 142 disk drives. Please contact Jerry Canady 377-9382 or 395-2494.

Brand new TI 99/4A (\$60), with like new 12" B & W Samsung, \$90. Gary King (319) 354-1191, Iowa City.

TI Recorder w/cords, Atari joystick Y adapter (no diodes), Tombstone City, Number Magic, Super Demon Attack, Computer Music Box, Touch Typing Tutor, Household Budget Management, Molesworth's Assy Language book. No reasonable offer refused. John Johnson (319) 366-4541 after 4 PM.

The following three items were gleaned from the SUNCOAST BEEPER Sept and Oct issues, from St Petersburg, Florida, with our thanks!

DID YOU KNOW:

That you can get a free demonstration of all the good stuff on GENie, the General Electric entry into the telecommunications field previously dominated by Compuserve and the Source? GENie is considerably cheaper, too, at only \$5.00 per hour, prime time, even at 1200 baud which generally is premium priced. It has a Texas Instruments SIG and a Kracker Box SIG (for those with a Gram Kracker). For your free demo, or to sign up, call 1-800-638-8369 via modem only. Here's how to go about it. Put your terminal emulator program, Fast-Term or whatever, in half duplex. After connection, type "HHH" and hit enter. At the U# prompt, type "5JM11961,GENIE", hit enter twice and you are on. The service will be explained to you while you are on-line with no obligation on your part.

Jim Swedlow, the author of the freeware utility, SIDE*PRINT, that takes your Multiplan spreadsheet and prints it sideways, has announced that he has discovered a minor bug in it. He has also fixed it. For those who have this handy-dandy item, all you need to do is change line #140 to read: 140 CALL INIT.

From NEWS NET 99ER, APRIL/MAY ISSUE: SLOWING FAST DM-1000 V3.1 by LOUIS GUION (courtesy of John Creviston)

The newest version of DISK MANAGER 1000 (DM1000, VERSION 3.1), suffers from the previously known defect of having any key which is depressed and held for only a moment running away at breakneck speed and repeating several times before you can get your finger lifted from the key. Fast? YES!, but a pain in the uh-huh!!!! Well, you can fix it anytime you like, and set the repeat action just as fast, or as slow as you want to make it. You must have a single-sectoring program like DISKO OR DISK+AID. Copy the file "MGR1" of DM1000 V3.1 to a *NEWLY INITIALIZED*, *BLANK* diskette. You'll have only the one file, "MGR1" on the new diskette.

Now, load your DISK+AID and either go to sector >36, or have the program search for the HEX string of 06 03 16 F9 03 80 00 A0 FF 00 00 1D. The important bytes are #s >42 and >43 which are the ...000A... in the string above. >00 A0 is 160 decimal to you and me and to our 3rd grade teachers. It can be written as 160d for simplicity. You may want to change the 160d, of >00 0A to another value which will slow down the repeat key. The range of acceptable values will fall between 160d to 2000d or hex values >00 0A to >07D0. Change it!

I use a value of 400d or >0190 to slow mine down considerably. You can use a value between the limits suggested so that it goes at the speed YOU want, and not the lightning, error-producing speed envisioned by the author. Use your single-sectoring program to change the 42nd and 43rd bytes of sector 36 from >00A0 to >0190 if you want to try the 400d speed I use. After making the change, save the altered sector back to disk. Now copy MGR1 from your original disk of DM1000, V3.1, and run the new speed to see if you like it or if you want more or less speed when repeating letters. If it doesn't meet your idea of the proper speed, you now have the knowledge to set any speed you want!!!!!!

TIPS FROM THE TIGERCUB

#48

Copyright 1986

TIGERCUB SOFTWARE
156 Collingwood Ave.
Columbus, OH 43213

Distributed by Tigercub Software to TI-99/4A Users Groups for promotional purposes and in exchange for their newsletters. May be reprinted by non-profit users groups, with credit to Tigercub Software.

Over 130 original programs in Basic and Extended Basic, available on cassette or disk, only \$3.00 each plus \$1.50 per order for PPM. Entertainment, education, programmer's utilities. Descriptive catalog \$1.00, deductible from your first order.

Tips from The Tigercub, a full disk containing the complete contents of this newsletter Nos. 1 through 14, 50 original programs and files, just \$15 postpaid.

Tips from the Tigercub Vol. 2, another diskfull, complete contents of Nos. 15 through 24, over 60 files and programs, also just \$15 postpaid.

*
* Tips from the Tigercub *
* Vol. 3 is now ready. *
* Another 62 programs, *
* routines, tips, tricks. *
* from Nos. 25 thru 32. *
* Also \$15 postpaid. Any *
* two Tips disks \$27 or *
* all 3 for \$35 postpaid. *
*

Nuts & Bolts (No. 1), a full disk of 100 Extended Basic utility subprograms in merge format, ready to merge into your own programs. Plus the Tigercub Menuloader, a tutorial on using subprograms,

and 5 pages of documentation with an example of the use of each subprogram. All for just \$19.95 postpaid.

Nuts & Bolts No. 2, another full disk of 100 utility subprograms in merge format, all new and fully compatible with the last, and with 10 pages of documentation and examples. Also \$19.95 postpaid, or both Nuts Bolts disks for \$37 postpaid.

Tigercub Full Disk Collections, just \$12 postpaid! Each of these contains either 5 or 6 of my regular \$3 catalog programs, and the remaining disk space has been filled with some of the best public domain programs of the same category. I am NOT selling public domain programs - my own programs on these disks are greatly discounted from their usual price, and the public domain is a FREE bonus!

TIGERCUB'S BEST, PROGRAMMING TUTOR, PROGRAMMER'S UTILITIES, BRAIN GAMES, BRAIN TEASERS, BRAIN BUSTERS!, MANEUVERING GAMES, ACTION REFLEX AND CONCENTRATION, TWO-PLAYER GAMES, KID'S GAMES, MORE GAMES, WORD GAMES, ELEMENTARY MATH, MIDDLE/HIGH SCHOOL MATH, VOCABULARY AND READING, MUSICAL EDUCATION, KALEIDOSCOPIES AND DISPLAYS

For descriptions, send a dollar for my catalog!

The READFILE subprogram on my Nuts & Bolts #2 disk has a backward parentheses in line 21161. This is the corrected line -

```
21161 DISPLAY AT(17,1):"OPEN
PRINTER #:"NAME? " :: ACCE
PT AT(17,15)VALIDATE(DIGIT)S
IZE(-3):P :: ACCEPT AT(18,7)
:P$ :: OPEN #P:P$ :: GOTO 21
163
```

When Texas Instruments developed Extended Basic, they took away the ability of Basic to redefine or color the characters in sets

15 and 16, ASCII 144 to 159, in order to make room in memory for sprites (they did let us have color set 0 instead. That is why Basic programs which use sets 15 and 16 will crash if you try to run them in XBasic.

Finally, John Behnke published in the Chicago Times newsletter an amazing routine which gave us back those missing sets. His routine was 13 sectors long. Recently, Richard Heath published in the L.A. newsletter a shortened version. And, without having any idea how it works, I have managed to scrunch it down to only 4 sectors -

```
1 CALL BXB
29999 !BXB by Jim Peterson,
adapted from VDPUTIL2 by Joh
n Behnke/Richard Heath
30000 SUB BXB :: CALL INIT :
: CALL LOAD(8194,37,194,63,2
40)
30001 CALL LOAD(16368,80,79,
67,72,65,82,37,58,80,79,75,6
9,86,32,37,168)
30002 !
30003 FOR J=1 TO 136 :: CALL
LOAD(9529+J,ASC(SEG$(J[\]$,
J,1))):: NEXT J :: SUBEND
30004 SUB CHAR(A,A$):: CALL
LOAD(9500,A):: CALL LINK("PO
CHAR",A$):: SUBEND
30005 SUB COLOR(A,B,C):: CAL
L LOAD(9492,8,15+A,(B-1)*16+
C-1)
30006 CALL LINK("POKEV):: S
UBEND
```

Note than line 30002 is missing. That's because there is no way to key it in. Once again we need a program that writes a program -

```
100 FOR J=1 TO 136 :: READ A
:: M$=M$&CHR$(A):: NEXT J
110 OPEN #1:"DSK1.BXBDATA",V
ARIABLE 163,OUTPUT :: PRINT
#1:CHR$(125)&CHR$(0)&"J[\]$"
&CHR$(190)&CHR$(199)&CHR$(1
36)&M$&CHR$(0)
120 PRINT #1:CHR$(255)&CHR$(
255):: CLOSE #1
130 DATA 2,224,37,20,3,0,0,0
```

```
,2,5,48,48,2,6,37,2,205,133,
2,134,37,17
140 DATA 17,252,4,192,2,1,0,
1,2,2,37,1,2,3,18,0,212,131,
4,32,32,20
150 DATA 200,4,9,80,2,32,3,0
,2,1,37,2,2,2,0,8,2,7,11,0,2
,8,7,0,193
160 DATA 1,192,193,193,180,9
7,133,145,135,21,1,113,136,6
,198,145
170 DATA 135,21,1,113,136,21
0,70,10,198,177,137,220,198,
2,131,37,10
180 DATA 17,240,4,32,32,36,1
6,6,2,224,37,20,3,0,0,4,32
,32,32,4
190 DATA 192,216,0,131,124,2
,224,131,224,4,96,0,112
```

RUN that to create a file BXBDATA on the disk. Then load the BXB program, and enter MERGE DSK1.BXBDATA. The unprintable line will pop into place. SAVE this completed BXB routine in MERGE format, and merge it into any Basic-only program. If you want, the result can be run through a Compactor program and turned into multi-statement program lines for more speed.

Or, you can write an Extended Basic program using all 16 character sets for graphics and color - actually 17, because set 0 is also available. Even the characters 24 through 31 can be redefined! Craig Miller has warned against fooling around in that area of memory, but there seems to be no problem with redefining the cursor (30) or the edge character (31).

Sprites can only use characters between 32 and 143 and their color cannot be changed with CALL COLOR(#, _). I have not found any other bugs, but have not had time for much experimenting.

Here's an easy Tigercub challenge - run this one in Basic, not Extended Basic.

```

>LIST
100 DISPLAY AT(1,1):0
>RUN
0
0
Why did it print the zero
twice?

```

I wrote this next one primarily for blind users. It converts each PRINT or DISPLAY directly to speech output and also provides a speech prompt for INPUTs.

```

100 !PRINT SPEAKER by Jim Pe
terson - to add OPEN #1:"SPE
ECH",OUTPUT and convert PRIN
T and DISPLAY statements to
PRINT #1
110 !Also writes a PRINT #1
for INPUT prompts
120 !Program to be converted
must first be SAVED in MERG
E format. Recommend it be RE
Sequenced before SAVEing, to
make room for INPUT lines

WARNING:

This article was found in the CLEVELAND AREA 99-4A USERS newsletter with original origin credited to FUNN from Portland. Thanks to both groups!

From PUNN, the Portland, Or. newsletter comes a warning excerpted from RAndy's RumOR RaG (A northwest BBS) to beware of a program which may be floating around the country's BBS's called supertrack. At first appearance, it seems to be a track copier, but in reality is a diskeater. This program was uploaded to my BBS recently and I suspect that it will show up around the country. I was suspicious at first because the program tells you to remove the write-protect tape from your master disk. I could not understand why this would be necessary, so I stuck 2 junk disks in my drives. When the program starts, BOTH drives come on and the heads chatter like crazy. Whatever was on your disks are zapped, and I doubt that the action the heads are getting is doing them any good also. The noise is quite loud. I have heard of similar programs for IBM which will zero-out a hard drive, but this is the first one I've seen to the TI. I just wanted to warn everyone so that no valuable programs or data are lost.

CASSETTE SYSTEM HELP:

The following was excerpted from a cassette hint column in the WEST PENN 9ERS newsletter that is written by Mickey Schmitt.
Thanks MICKEY and WEST PENN!

!...Let me introduce you to Clyde Colledge's: High-speed cassette loader.

The high-speed cassette loader utility was written for people who have added 32K memory expansions to their computer. It is hoped that this utility would make adding 32K memory expansion a more useful addition to basic computer systems. The assembly language routines that do the saving and loading of programs are loaded very easily from cassette tape and reside in an area of memory not usually used by extended basic programs. The high-speed cassette utility will allow the loading and saving of programs up to 24K bytes in length. In addition to increased program size. The same size program can be saved or loaded in approximately half the amount of time that the original routines required. The increase in speed is due to removing duplication of data sent to the cassette recorder. While this decreases reliability slightly, few errors have been encountered in use and error checking is still used. The size limitation was increased by writing directly to memory expansion rather than to the console memory which the program was sent to by the original cassette routines.....

-- This column runs monthly and will cover the instructions for this program and method to obtain it next month. If there is sufficient interest in this information, let me know and I will continue the excerpts or other coverage you may desire. SEE ME OR CALL.ed.

"THIS COULD BE THE START OF SOMETHING BIG!!"
