*****NEWSLETTER TOPICS*****

1. Future Meeting Dates
2. News Meeting Notes
3. Minutes From Mar Meeting
4. New Officers
5. Highlight Those Inputs
6. Error Codes

*****FUTURE MEETING DATES*****

Please mark the following dates on your calendar for future meetings:
APRIL 13, MAY 11, JUNE 8.

*****NEXT MEETING*****

Monday, Apr. 11, 7:00 PM at the JA building, 330 Collins Rd. NE.
Special Interests continued.
Jim Green will review some programs he downloaded from GENIE. One is a unique form of solitaire. Should be interesting. Come and join the fun!

****MINUTES FROM MAR MEETING****

The CV 99'ers UG meeting was called to order at 7:07 PM on March 9, 1987 by President Jim Green. Eighteen members and one guest were present. The minutes of the February meeting were approved as printed in the newsletter.

The treasurers report covering the past three months was read and approved.

The following discussions of problems took place:

Ed Hagel reported on a graph printing problem. Several suggestions from the UG were made. Ed will try some of the ideas that were new to him.

Mike Bonifazi reported on an audio problem he is experiencing. The discussion centered on a possible bad cable being the cause. Gary Bishop would be available if further help was needed.

Election of UG officers for the new year. President Jim Green introduced the candidates selected by the election board. They have volunteered to serve for the coming year. The floor was opened for further nominations or volunteers. None were forthcoming. The election followed.

Ed announced after counting the ballots that the following were unanimously elected to take office in May.

PRESIDENT-----JERRY CANADY
 VICE PRESIDENT-----BRUCE WINTER
 SECRETARY-----BILL PAETH
 TREASURER-----JIM HARRINGTON

Jim Green volunteered to take over as newsletter editor. Still needed are people for the following committee positions.

PROGRAM-----
 PUBLICITY-----
 EDUCATION-----

Any one interested? This is your club and can only be as effective to your wants and needs as YOU want it to be.

Business meeting was then adjourned.

Programs of the evening.

Jerry Canady tried to demonstrate "Print Gems". This is a fund raiser program on disc by the LA UG. He has been using it for the newsletter but due to a faulty disc drive on the clubs system had to tell about it and show some of his past experiments using the programs.

Ed Edwards - Demonstration and question answering session of Ver 5.0 of "Creative Filing System". This is a Fairware data software described in the February newsletter.

Ed Hagel - After finally obtaining a power cord for his system showed the "Microsoft Multiplan" and how he has used it to keep the books of the UG.

A fourth system was being used to make copies of programs in the UG library.

Thanks to all for the demonstration and entertainment for the evening.

Bill Paeth won the door prize for the evening. It was a years subscription to RAD COMPUTING donated for running their ad in the February newsletter.

-Submitted by Bill Paeth acting secretary.

NEW OFFICERS ELECTED

Congratulations to the new officers of the Cedar Valley 99'ers! The following people were elected UNANIMOUSLY at the March meeting:

President - Jerry Canady	Vice-President - Bruce Winter
Secretary - Bill Paeth	Treasurer - Jim Harrington

The new officers assume their duties on May 1. We should all be grateful to these four people for volunteering their time and energies to keep our group going. Having been president for the last two (or is it three?) years, I know how much the officers will gain by being unselfish with their time. It really is true that you get out of an organization more than you put into it.

Which brings me to the second part of this article...we still have room for more volunteers to step forward! I agreed with Jerry to take on the newsletter editor's job if he agreed to run for president (I wonder who got the best of the deal here?), but there are other positions not yet filled for the coming year. We need a program chairperson to help plan the topics for the monthly demonstrations. We no longer have an education chairperson to help organize classes. Paul Mortenson could use some help with publicity. And the list goes on... Please decide which job you can help with, and give our new president a call. We need you! Other clubs across the nation are dying out due to apathy from the membership; let's not let ours be one of the casualties. Ask Jerry how you can help.

By the way, now that I have to do the newsletter, I could use a little help, too! Let's get some more original input from the membership, so that our newsletter does more than reprint other peoples' articles. Write me a short note on how you have used that last program you received from our library, for example. We accept all input.

From the soapbox,
Jim Green

WELCOME NEW MEMBERS!

We welcome the newest members of our group, and we hope you enjoy us as much as we enjoy ourselves. (Egotistical?)

Sister Pat Taylor, Dubuque

??????

??????

ed note: To echo Jim's thoughts and thank him for all the help in the past!! we'll decide about the best deal latter!

For those looking for something more advanced in programming and TI use, the "SMART PROGRAMMER" would be a must addition to your library.

Following an article by Richard M. Mitchell to whet your appetite!!!

Highlight Those Inputs!

I find using XB's SIZE with ACCEPT to be quite useful, but there is no automatic graphic representation of the size of the input field and a user typically keys until the program honks at the end of a field. Input fields are often indistinguishable from the remainder of a screen, making entering data dull and sometimes frustrating. Extended BASIC allows some ways to spice up your program.

As background info, keep in mind that SIZE can be used not only to automatically limit the maximum size of a field, but also to prevent over-writing text to the right of a field.

An input (ACCEPT) field typically will be filled with blanks because a blank is recognized as a delimiter in XB (input is truncated to the last non-blank character). Obviously, to differentiate the blanks in the field area from the rest of the screen, we need non-blanks filling the remainder of the screen. This differs from what is typically referred to as inverse text, as our text remains normal, with the remainder of the screen inverted! The quickest method of inverting the screen characters is to "paint" the screen first, then paint in our prompts and input fields. In the example that follows, because of the character set limitations of the 9918A VDP in the 99/4A, our text for prompts will be colored the same as the color of our input fields, but that's still a vast improvement over not being able to visualize the field size at all!

So, here's the example, which runs in TI or MYARC XB:

```
100 CALL CHAR(143,RPT$( "F",160))
110 CALL COLOR(14,5,1)
120 CALL HCHAR(1,1,143,768)
130 DISPLAY AT(5,1)SIZE(18):"WHAT IS YOUR NAME?"
140 CALL HCHAR(5,22,32,8)
150 ACCEPT AT(5,20)SIZE(-8):NAME$
160 DISPLAY AT(23,5)SIZE(-20):"PRESS ANY KEY TO END"
170 CALL KEY(5,K,S): IF SK1 THEN 170 ELSE CALL CLEAR
180 END
```

When you run the program, your screen will change to blue, but your text and input field will remain black on cyan, so that they're highlighted! Assembly programmers may want to replace the HCHAR's with equivalent A/L code to speed things up, especially for TI XB.

Wasn't that an easy route to a useful trick?

ed note: This is an excellent magazine with articles and programs for various languages and uses.

If you are interested in subscribing but don't have the address see one of the officers.

The following error code listings were printed in the February, 1986 issue of HOCUS, Newsletter of the Milwaukee Area 99/4 User Group of Wauwatosa, Wisconsin.

EXTENDED BASIC

- 18 Numeric Overflow
- 14 Syntax Error
- 16 Illegal after Sbrtn
- 19 Name too long
- 28 Unrecognized Char
- 24 %/! Mismatch
- 28 Improperly used name
- 36 Image error
- 39 Memory Full
- 40 Stack Overflow
- 43 NEXT without FOR
- 44 FOR-NEXT nesting
- 47 Must be in Sbrtn
- 48 Recursive Sbrtn CALL
- 49 Missing SUBEND
- 51 RETURN without GOSUB
- 54 String Truncated
- 56 Speech \$ too long
- 57 Bad Subscript
- 60 Line not found
- 61 Bad Line #
- 62 Line too long
- 67 Can't CONTINUE
- 69 Command illegal in prgrm
- 70 Only legal in prgrm
- 74 Bad Argument
- 78 No program present
- 79 Bad value
- 80 Nil
- 81 Incorrect argument list
- 82 Nil
- 83 Input Error
- 84 Data Error
- 97 Protection Violation
- 109 File Error
- 126 I/O Error
- 135 Sbrtn not found
