

LA 99^{ers}

COMPUTER GROUP

Newsletter

VOL. 2, NO. 7 Los Angeles, CA SEPTEMBER 1983

WERE YOU THERE?

The first annual all clubs picnic was a wonderful success for all who were there. What we lacked in numbers we made up for in enthusiasm and good cheer. Hot dogs, cold drinks and good times were had by all. It was fun to meet everyone and chat and munch together. Several families came from the Valley Group to add to the gaiety. There were some great deals on Software and some hardware plus demonstrations of a terrific graphics module. The winners of the drawings included M. Phillips (99/4A), Bill Leonard (Peripheral box), Heather Parks (Munchman), Wayne Besenty (Beanstalk software), and Fred Dobler (Beanstalk software). Congratulations to all five Winners and good computing!

A lot of people worked very hard on the picnic and a special vote of thanks goes to each of them for their devoted service. Be sure to thank Kerry Martin, Dick Martin, Arnie Setz and Terry who spent long hours organizing the raffle, food purchasing and preparation and final execution of this great outing. These were not the only ones. Many thanks to all who helped with the picnic.

ELECTRIC VISIBILITY COMES TO THE LA 99'ers

Our computer club has recently entered an advertisement in BUY PHONE, a computerized phone book. Buy Phone is only accessed by modem but is free to any caller. We are listed under several headings including computer, user groups, clubs, etc. Give it a call. The phone number operates 24 hours a day, 7 days a week. Call 474-0270 (300 Baud).

TERRIE'S CORNER

A fellow 99er member, Lloyd McClellan, recently had an encounter on foot with a automobile on the sidewalk. He will not be on foot for quite some time. After discharge from Northridge Hospital he will be at home, 19857 Labrador, Chatsworth, CA 91311. Mac tells me frequency interference did not allow him to "compute" in his hospital room. He will certainly enjoy any "basic" you wish to send his way.

99ers Jay and Regina Raven have recently completed an alphabetical topic listing of 99er Magazine from Vol.1-1 through Vol. 2-9. They have done a fantastic job--look for this listing at the next meeting. Thank you so much, Jay and Regina.

The following software producers have responded to my request for information on their programs and have had their material included in the software binders I am maintaining. Yes, I said binders-plural. In order to make this material available to more members I am splitting them alphabetically over 3 or 4 binders. They include:

Amnion Stoneware (Wordtex), Arro-soft, Bach Co., Bill Bies, BRouter Computer Letter, BTRS, BMU, CSA, Creative Scientific Services, Cintronics, Devere Co., Dynamic Data-Devices, Walter J. Dollars, Richard F. Erznosnik, Greene-Bytes, J KH Software, Kidware, Mecca Inc. Myarc, Newmar Computer Suppliers, NSY Software, Oak Tree Systems, Peripherals Etc., Software Carousel, Solutions Software, Tab, Tape, Tonex, Texas Software Design, Tex Comp, Texware, the 99/4 Program Exchange, the Softers, Torres Ribbon Service, Lender-ware Software Innovations, Vaughn Software, Videotex HSK Infocom, Western Properters Investment CO., W.O.R.D.

The following are recently received and are now being added:

Control Data (Plato), Orange Micro, Wood Software, James Harvey, Tiger Club Software, Welcom Software Technology, the Upper Room, Micro-Melamed Software Co., Theobyte, Alpha 2, Microworld, Gold Coast Avionics, Soundware, Pewterware, Rumplestiltskin Software, Pegasus Software, Lolita Walker Gilkes, M.C.A.I. 99er Ware.

I will update this list monthly in this column.

Sanford Sigal, President of American Computer Software, is looking for programmers to convert software originally written for Atari to TI 99/4A. They will pay a flat fee up to \$2000, plus royalties. The work can be done at home. This is a rush request. Contact him at (213) 392-9666 or 1353 Preston Way, Venice, CA 90291.

Next month I will categorize the newsletters we receive and also split them into several binders. A request was made recently to take binders home for a short time. Sorry, we must decline. They are with me at my home and, with prior arrangement, you may see them there. Contact me at (213) 271-6930.

Now, a personal request. My 83 year old father just suffered a stroke. He needs both physical and mental stimulation. I would like to start him on a computer for both finger and brain agility. If anyone can offer any suggestions as to programs an elderly gentleman can use to meet these needs, I would be very grateful. In the beginning modules would be easiest, action games would be too frustrating. Word games similar to the word jumble in LA Times interest him. He is currently still hospitalized but once home in

Newberry Park I would like to begin quickly. Thank you for any input.

See you at the next meeting. I still have some Regina books and once again Sprite Books, with the Best of 99er coming soon-I hope.

LIBRARY NOTES

Good News/Bad News September 1983

The GOOD NEWS is that The hardworking Library Committee has finally realized that the present format of the Software Listing should be developed to reflect the current state of the art enhancements available. The completely revamped **SUPER** Listing has the Power(that is of MULTIPLAN) behind it.

Plans are under study to issue monthly updates in our Topics Newsletter in the form of supplements for members to conveniently file with their Master Listing.

The BAD NEWS is that we are still faced with a few bugs to iron out before we start the task of patiently reviewing each and every program to fit the new number configuration.

To minimize the inconvenience to our Members the current format will remain in effect and probably run in parallel until the system is completed. Please bear with us we think this new setup shall greatly facilitate ordering procedures as well as cataloging. Next month we may be able to give our members a glimpse of updates.

KERRY'S PROGRAM

By Kerry Martin, Vice President Librarian

Well, I hope everyone had fun at the picnic on the 18th. I know I did and I hope everyone had enough to eat. I also hope everyone enjoyed the talk on FORTH at our last meeting. I have seen a demonstration of the game "Break-Out" written in FORTH and it is very fast. I hope in the future to have some programs in this column in FORTH.

I received a program to evaluate from "Oak Tree Systems" called "SMASH: a Program Optimizer". Smash is designed to minimize the size of any Extended Basic program by combining lines, shortening variable names, including function and subprogram names, and deleting REM's and tail marks. Smash also can be used to convert console Basic to Extended Basic. I have used this program and in my opinion, it is a very useful utility program. Its cost is \$24.95.

This month's program is called Tank-Fight and works in either Basic or Extended Basic. It has everything except for score keeping. That is your project for the month.

Dick Martin is still working on the new Library Listing and when it is done it will help you know what programs are available to club members. Well, see you at the next meeting!

```

Programming Tip

Courtesy of JUG, TI 99/4 JSC Users Group, Houston, Texas

"The following was taken from the Sidney News Digest (Australia) Feb. 1983 Newsletter:

'Use the following subroutine to protect your SECRET programs on cassette or disk:

```

12 P$="<<<<>>>>"          32000 CALL CLEAR
14 CALL CLEAR                32010 PRINT "SECURITY VIOLATED"
16 INPUT "ENTER SECURITY PASSWORD":PW$ 32020 PRINT "PROGRAM ABAORTED!!"
18 IF P$<>PW$ THEN 32000    32030 FOR I=1 TO 2000
20 PRINT "CORRECT PASSWORD"  32040 NEXT I

```

Use lines 21 - 31000 for your program. Your password <<<<>>>> can be any codeword desired.'

SPRITE ONE LINER

By Barron Bartlett

Reprinted from Hug Newsletter

Want to frustrate and amaze your Atari, Vic-20, Color Computer friends? Just type in the following in the command mode with Extended Basic.

```

CALL CLEAR :: CALL SCREEN(5) :: CALL MAGNIFY(2) :: FOR I=1 TO 28 :: CALL
SPRITE(#I,64+I, 16,80,80,3*I,8) :: NEXT I :: FOR J=1 TO 5000 ::
NEXT J

```

Hit ENTER and watch all 28 sprites do their tricks. If you want to see it again, simply hit function REDO then ENTER again as many times as you want to. You can also INSERT, DELETE, etc. to try different speeds, colors, charactes, or even add a line number to make it a one line program.

DID YOU KNOW THAT by chick

If you need a border on all four sides, it can be written in two lines ? Try it!

```
100 CALL VCHAR(1,31,42,96)
110 CALL HCHAR(24,1,42,64)
```

Or have you ever pressed ERASE by mistake and lost the whole line ? Don't panic and above all don't press ENTER. Instead press FCTN P (the quotation mark) and ENTER. Your line will still be intact.

This one comes from PERIPHERAL, Pittsburgh Users Group.

EXTENDED BASIC RUN "CS1"

This is an undocumented command available in Extended Basic. The command kills two birds with one stone.. it will load a program from cassette as usual, then it will automatically RUN the program. Type in RUN "CS1".

MG DISCOVER TI POWER!

Discover Millers Graphics

Whether you're into fast action games, programming, or educational software, Millers Graphics products will challenge you and your TI 99.

- Professional quality
- Easy to understand programming books
- Exciting action games written in powerful Extended BASIC
- Impressive, full color graphics
- Dynamic sound effects
- Educational software
- 15-day money back guarantee
- Fast delivery anywhere in the world

SMART PROGRAMMING GUIDE FOR SPRITES

This 80 page book will show you some of our professional programming secrets on how to:

- Use CALL PEEK
- Get sprites to pick up objects, eat dots and lay down a trail
- Shoot sprites without missing a coincidence
- Make one sprite chase another
- Write a general bar graphing program
- And much more. Extensive step-by-step documentation.

Helps you get the very most out of your TI 99 in Extended BASIC!

Only \$5.95 (plus shipping) from Millers Graphics

7 OUTSTANDING GAMES

- Alphabet Soup
- Casino Blackjack
- The Pharaoh's Tomb
- Battle Over Titan
- The Crazy Fun House (9 screens, 32 levels of fast action)
- Blackbeard's Treasure
- And, coming soon, NIGHT MISSION!

Don't miss any of these exciting Millers Graphics games! \$14.95 on cassette, \$17.97 on disk (plus shipping)
