More II-SDOM-

Some of this letter (AND EVEN more in the future) is being prepared
using the MY-Word Word processing program on the Myarc Geneve 9640
computer. The speed and power of it is phonomenal. I could keep
over 8,000 80-column lines in memory! All of the format codes are
embedded in the text and many new one-step key presses really
make it nice. Be sure to see it in acTIon at a meeTIng. It makes
a powerful partner to the Microsoft MulTIplan program upgrade in
80-columns with super fast RECALC and enough space for a full 63
column by 255 row spreadsheet. More to come from Myarc in the
future, too! The MDOS operaTIng system that I have now shines
with many great commands using the same syntax as MS-DOS or
PC-DOS and F-A-S-T-E-R than anything you've yet seen, except on
an enormously more costly machine. It runs the TI cartridges too,
with a GPL loader which will execute them at five different
speeds. On speed "5" they run about 4-6 TImes faster than you can
think. You should try PARSEC on "5"!

Well you can tell that I'm excited about this machine and all of
its possibiliTIes. It is a speedy companion to the 99/4A world
and with more improvements to come, it should establish its own
special niche. Special thanks to Jack Riley of MYARC, Inc.

WE WELCOME ALL NEW MEMBERS AND VISITORS!
