

### RAMBLIN' THOUGHTS FROM THE PRESIDENT

AS I REFLECT BACK UPON THE MONTH THAT JUST PASSED, I PERSONALLY THINK WE HAD A GOOD TIME AT OUR LAST CLUB MEETING. WE HAD AN OUT OF TOWN VISITOR FROM DAYTON OHIO BY THE NAME OF MARC GEORGES. HE BROUGHT US UP TO DATE ON SEVERAL OF THE CLUBS THAT WE HEAR AROUT BUT SELDOM HAVE THE OPPORTUNITY TO VISIT. ALSO, WE SHOULD NOT FORGET THE MEMBERS WHO WERE PRESENT AT THE MEETING AND THANK THEM TOO. WE HAD OUR SECOND INSTRUCTIONAL CLASS ON "TI-BASE"... HOW TO CREATE A DATA BASE. WE ALSO LEARNED SOME OF THE OPERATING COMMANDS.

I HAVE TO GIVE A LOT OF CREDIT TO FRED FOR GETTING UP THERE AND TEACHING THE WAY HE DOES. HE HAS A LOT OF THAT STUFF THEY CALL INTESTINAL FORTITUDE BECAUSE IT IS LITERALY SCARY TO STAND IN FRONT OF GROUP OF PEOPLE. IF YOU DON'T THINK SO; TRY IT SOMETIME! IT IS EASIER FOR ME MONTH AFTER MONTH, ALTHOUGH I STILL GET STAGE FRIGHT.

EARL REGASE GAVE A DEMONSTRATION OF SOME "FORTH MENUS" AND ALONZO SLADE GAVE A DEMONSTRATION ON THE "MUSIC PRO." DISK. I HOPE THAT THE GOOD NEWS WE READ ABOUT IN THE NEWSLETTERS IS NOT SO CALLED VAPOR WARE. OF COURSE I AM TALKING ABOUT THE MIDI INTERFACE THAT WAS ANNOUNCED BY ASGARD. IF YOU DON'T SUBCRIBE TO MICROPENDIUM MAGAZINE, YOU SHOULD. IT IS, AS FAR AS I KNOW, THE ONLY MAGAZINE STILL DEDICATED TO OUR ORPHAN COMPUTER. THEY HAVE REVIEWS OF SOFTWARE AND HARDWARE AND NEW PRODUCTS. THIS IS NOT AN ADVERTISEMENT FOR THEM JUST MY OWN OPINION. THEY ALSO ANNOUNCED THERE ARE TWO NEW PE-BOXES FROM RAVE.

IF YOU HAVE READ THIS PAGE THE LAST COUPLE OF MONTHS, ( AND I HOPE YOU HAVE ) YOU MAY HAVE NOTICED SOMETHING. THE CLUE IS IN THE CONTENTS OF THE PARAGRAPHS. WELL I WILL TELL YOU ANYWAY. NOTICE THE WAY THE PARAGRAPHS RAMBLE FROM ONE THING TO ANOTHER? THAT IS HOW I CAME THE NAME FOR THIS PAGE. IT'S SORT OF LIKE DAY-DREAMING...YOUR THOUGHTS RAMBLE FROM ONE SUBJECT TO ANOTHER. I THINK MOST OF THE TIME I AM IN A SLEEP STATE. MAYBE I STAY ASLEEP AND DON'T KNOW IT. ABOUT BEING ASLEEP.I MUST HAVE BEEN DOZING OFF AT THE LAST MEETING. HAVE A PERSON IN OUR USERS GROUP BY THE NAME OF STEVE MEHR. HE IS OUR PROGRAM CHAIRMAN. BUT PICTURE THIS; THREE PEOPLE SITTING IN THE FRONT ROW...EAGERLY WAITING TO DEMONSTRATE THREE SOFTWARE PROGRAMS...AND I DIDN'T EVEN LET STEVE INTRODUCE THEM. I FORGOT AND DID THE HONORS MYSELF. PLEASE FORGIVE ME, STEVE. (IT TOOK A LOT OF COAXING TO GET HIM TO BECOME OUR PROGRAM CHAIRMAN AND HE IS VERY GOOD AT IT). HE ALSO DRIVES ALL THE WAY FROM OXNARD TO BE HERE WITH US. I CAN'T BELIEVE I DIDN'T LET HIM SAY ONE LITTLE WORD. FORGIVE ME, STEVE.

(Continued next page:)

(Continued from Page 1)

I WANT TO PRESENT A CHALLENGE TO THE MEMBERSHIP. I WOULD LIKE YOU TO WRITE ONE OR TWO PARAGRAPHS FOR US. IT CAN BE ON ANY SUBJECT THAT YOU CHOOSE. WE ONLY HAVE ONE REQUIREMENT, ( KEEP IT CLEAN ). YEW DON'T EVEN HAFT TO SPEL GUD .. IF THAT DON'T PRUVE IT I DON'T NO WOT WIL.

WE HAVE AN EXCELLENT EDITOR WHO CAN CORRECT THOSE LITTLE THINGS. HE DOES A GREAT JOB. ESPECIALLY WITH MY CONTRIBUTIONS. THE WAY I SPELL, IF I EVER WROTE A NOVEL, IT PROBABLY WOULD TAKE A WHOLE STAFF OF EDITORS SEVERAL WEEKS TO CORRECT IT. CHICK MADE THE STATEMENT THAT HE THOUGHT THAT HE WAS THE WORST SPELLER IN THE WHOLE WORLD UNTIL HE HAD TO CORRECT MY ONE LITTLE PAGE. I PERSONALLY THINK THAT HE IS VERY GRATEFUL THAT HE DOESN'T GET TWO OR THREE PAGES FROM ME.

LOOKS LIKE I AM RUNNING OUT OF SPACE AGAIN. SO THATS ALL FOR THIS MONTH. GOOD-BY TILL THE NEXT TIME.

YOUR PRESIDENT EDGAR A. May

### NOTICE to NEWSLETTER EDITORS

Please check the weight of the newsletters before mailing them. Although I have been involved in the exchange of newsletters for over four years, I have had to nay nostage for three User Groups in the passed four weeks. It is certainly not a matter of big money, just an inconvenience (I have to take the red notice card to a clerk, and pay the postage) before I can get the newsletter...and secondly, it's unfair.

So if you would check that for me, I would appreciate it.
Thank...Chick

P.S. We inadvertently gave you folks a wrong P.O. Box number on the 'change of address' notice we mailed. The correct number is P.O. Box 7746. Sorry 'bout that.

### MEETING NIGHT

Normally the LA 99er meetings are held on the 4th Wednesday of each month, but another organization required EVERY Wednesday in June, and we were asked to choose another day. In short, the date for this month's meeting is the 26th...the 4th Tuesday!

### WORD FUN By Earl Raguse

The source of this strange test is completely unknown. I originally encountered a shorter list on the Parsons (ES) Pasadena commuter van. No answers were provided, but after many trips, we worked out answers that fit, not the right ones maybe, but they worked per the instructionbs below.

No one seems to know WHAT the test tests: certainly not intelligence, or engineering skill, but getting most of them may carry a message about your personality. I would rather not say what. I added at least half of the following in an attempt to use all the numbers from I to 100, as you can see, I did not succeed. If you are able to supply additional ones please contact us. Answers will be supplied you on request. Contact the Editor, or

Earl Raguse 17161 Edwards Street Huntington Beach, CA 92647.

INSTRUCTIONS: Each quotation below contains the initials of the words of a saying, fable, song, poem, etc. related to the preceeding number. Your job is to figure out the words. For example, 3 L P would be 3 Little Pigs, the number is part of the solution and is not even related to the number of letters or words. You may need to add "is" or "is the" after some numbers.

Good Luck! You will need it. If you do get all the answers, maybe you are some kind of genius. Oops!! this thing is not supposed to test for geniosity.

ANATOMY QUIZ By Earl Raguse

Can you name at least 9 body parts which have only three letter names? All the names are in everyday use, so a medical degree is of little value. If you get stuck, see a list of 10, 3-letter body part names elsewhere in this newsletter.

### NEW SOFTWARE COMPANY

KB COMPUTER CONCEPTS is a new TI-99/4A software supplier, headed by Kaith Bergman. The company is located at 653 1/2 Fair Ave NW, New Philadelphia, OH 44663 and is offering a free catalog of its products. Items in the catalog include SPINNER, a wheel of Fortune type game for 1 to 3 players and "phrase disks" for SPINNER offering different phrases for the game. The game sells for \$12 and each phrase disk is \$5. Contact the supplier direct to get the catalog or to order.

VAST NEWS

### TI-BASE COMMAND FILE MERGE UTILITY

Bill Gaskill Grand Junction, Colo.

One of the neatest features found in TI-Base V3.0 is the ability to program inverse video into your command files. While you can "inverse" everythina that i S displayed on a screen with the SET INVERSE ON directive, there are many times when you would probably want to only have certain portions of the screen displayed as inverse video. An example might be to highlight the length of an input field. This can be done by adding the number 128 to the ASCII code for the character(s) to be inversed, and then holding down the Ctrl key and typing in the resultant value. For example, you would type in Ctrl 160 to highlight a blank space (32+120=160). Since the ASCII value for a blank space is 32, you would add 128 to it to arrive at 160. If you had a 10 character input field, Ctrl would be keyed in 10 times in the TI-Base command file editor, in the WRITE statement for the line that was to display the input prompt.

The purpose for the Extended Basic program below is to allow command files created in TI-Base to be joined so that features such as selective inverse video can programmed into a larger file and then be saved. Currently, a command file created in TI-Base's resident command file editor can only be about 50 lines long, even though the TI-Base program itself can read and interpret command file of virtually any length. While 50 lines may be adequate for many purposes, it does not allow enough space for really sophisticatéd applications like custom input screens and menus. Since you MUSI use the resident create command file editor to selective inverse video, larger command files with selective inverse video simply cannot be created.

When TI-Base began supporting DV/80 command files in V1.1 I began using TI-Writer to create them. This allowed me to create files as large as I wanted without fear of getting that dreaded "can't get dynamic memory" error message. But files using selective inverse video control characters can't be created nor loaded into TI-Writer (it locks the program up), so I decided that the solution was to create the files in segments in the TI-Base command file editor and then merge them into one large file.

MERGETIB program listed The below does just that, and it retains the selective inverse video control characters in the process. set up to merge two command files of any size into a single command file that is automatically saved in the /C format that TI-Base requires. you start the program it prompts you for the path and name of the first half of your command file and then the path and name of the second half. Finally, you enter the path and name of the file that will be saved for use in TI-Base. You DO NOT have to add a /C to any of the file names entered. The program does that for you.

You may specifiy any path, including WDS1 for hard drives and you may also build in directory names. The only limit is the 28 character limitation of the ACCEFT AT statement in Extended Basic. When you are done the resultant command file may be activated in TI-Base with the normal DO FILENAME command, and your inverse video will appear as planned.

Although MERGETIB only accepts two files at a time, you can of course merge as many segments as desired. If you had a four segment command file you would simply merge segments 1 and 2 and save them as say segment A. Then you would merge segments 3 and 4, saving them as say segment B. Finally, you would merge segments A and B and save them as the final command file name that you wished to use in TI-Base.

### Did you know that...?

### by Chick De Marti

#### June 1990

### FAREWELL ISSUE

After four years of producing Did you know that...? I feel it's By now most of time to move on. you as much (or more) about the TI as I do...and besides, I'm just plain due for a change. For the last two(+) years I have also been writing a column in the TICO TOPIC newsletter of the TRI-VALLEY 99er. The column is called 'The Cracker Barrel and in this column I have a little more freedom to drift away from strickly Computer talk. We discuss things like:

'The therapeutic Value of talking To Yourself' (What man hasn't felt better after stalking out of the house muttering to himself, "She can't tell ME what to wear!"?).

Oh yes! I will continue to enlighten you with strange quirks of the TI that I stumble onto. And yes! I will continue to submit my articles to TRI-VALLEY 99ers. but both will receive the same pages.

And One more thing, I intend to make the column 3 pages long, and forego the occasional 'Bonus Page'

With that off my chest, let's get down to business.

### RANBLES

### by Stephen Shaw, England

I found this in the TIsHUG News Digest of Australia. In it Stephen says, "...one aspect of Basic not exactly covered in your manuals is the use of AND in a compacted data type situation.

Let us say we have a user group whose members have different items of equipment. Lets allocate powers of two to each item of equipment:

CONSOLE = Ø EX BAS = 2

(more next column)

(RAMBLES cont.)

32K = 4 \$S\$D disk = 8 D\$SD disk = 16 PIO = 32 MODFM = 64 etc up to 32K.

Now add up the values of the items of equipment each member has, and obtain a total. We can find out from the total -which occupies only 8 bytes!-by use of the AND operator, thus:

INPUT "MEMBER TOTAL: ": TOTAL
IF TOTAL AND 2 THEN PRINT "M
EMBER HAS EX BAS"
IF (TOTAL AND NOT 4) = TOTAL
THEN PRINT "MEMBER DOES NOT
HAVE 32K RAM"

Get the idea? Try it out!

And so I did (the I den't understand the part about "...eccupies 8 bytes) and wrote this little routine to try it out.

10 CALL CLEAR 20 PRINT "CONSOLE = 0 ... E X BAS = 2" 30 PRINT "32K **⇒** 8" SSD 40 PRINT "DSSD = 16 ... P RINTER= 32" = 64" :: P50 PRINT "MODEM RINT : : 60 INPUT "Member total :":TO TAL" 70 IF TOTAL AND 16 THEN PRIN T "Double sided!" 80 GOTO 10

Sure as shooting, I entered 20 (16 and 4) and the program responded, "Double sided!". The same for 26 and 62! And when I entered 42 (32,8, and 2) there was no response (therefore no double sided drive. Then an idea struck me, the zero seemed ignored??

(the plot thickens...)

(the plot continues...)

So this time I entered 0 meaning I only own a console...but there was no response. Hum, this only proves I don't have double sided. So I made a samll change:

70 IF TOTAL AND 0 THEN PRINT "Console!"

I ran the program again, entered 0 and received no response? meaning I don't own anything???

I can only guess that it has something to do with two negatives make a positive, or is it, two positives make a negative...Im not positive!

As long as I had started this project, I thought I'd finish it. The following might be a routine a club would have for keeping the data on equipment for each member. Add these lines to the above:

60 PRINT "Member A total is 14": "Member B total is 50" 70 PRINT "Member C total is 46": "Member D total is 118" 80 DISPLAY AT(11,1) BEEP: "Whi ch member :" 90 ACCEPT AT(11,15)SIZE(-1)B EEP: M\$ 100 RESTORE 110 DATA A, 14, B, 50, C, 46, D, 118 120 FOR @=1 TO 4 :: READ MEM\$ , TOTAL 130 IF M\$=MEM\$ THEN 160 140 NEXT @ 150 PRINT "Try again..." :: GOTO 240 160 DISPLAY AT(L,3): "Member ";M\$;" has" :: L=L+1 170 DISPLAY AT(L, 10): "Conso le" :: L=L+1 190 IF TOTAL AND 2 THEN DIS PLAY, AT(L, 10): "X-Basic" :: L=L+1 190 IF TOTAL AND 4 THEN DIS PLAY AT(L, 10): "32K Ram" :: 200 IF TOTAL AND 8 THEN DIS PLAY AT(L, 10): "Sssd Disk" : : L=L+1

210 IF TOTAL AND 16 THEN DIS PLAY AT(L.10): "Dssd Disk" :: L=L+1 220 IF TOTAL AND 32 THEN DIS PLAY AT(L, 10): "also A Printe r" :: L=L+1 230 IF TOTAL AND 64 THEN DIS PLAY AT(L, 10): "and a Modem" :: L=L+1 240 L=L+1 :: DISPLAY AT(23,5 )"Another one (Y/N) :" 250 ACCEPT AT(23,24)SIZE(-1) :YN\$ 260 IF YN\$="Y" OR YN\$="y" TH EN L=12 ELSE GOTO 290 270 FOR WIPE=11 TO 23 :: DIS PLAY AT(WIPE, 1):"" :: NEXT W IPE 280 GOTO 100 290 END

~~~~~~~~~~~~~~

### TI-Base Hint

(also from Stephen Shaw's RAMBLES)

"Having spent 5 months indexing the TI\*MES (newsletter), I then set out to right-justify the page numbers by adding a zero in front of single digits as follows:

REPLACE PAGE WITH "01"; FOR PAGE = "1"

I made the drastic mistake of not using a copy file, and the jolly thing went and changed all the pages 1,10,11,12,13...19 to 01. End of index to aTI\*MES for a little while.

Moral: Never assume any program acting on a file is going to work as you think it will—always use a copy file and retain the original for some time! REMEMBER—when using TI—Base, the comparison is with the 1st N letters only; where N is the length of the test string. It should be:

REPLACE PAGE WITH "01" ; FOR (PAGE=1) .AND. (PAGE<"10)

I'm out of coffee,
See you next month

### BIGGEST LITTLE COMPUTER

"Computers are getting smaller than ever, except in Boston. There on Museum Wharf overlooking the harbor, the worlds largest micro-computer takes shape!" This revelation was made by COMPUTE! Mag. April '90 issue, as it describes a giant two-story-walk-through computer being built. You'll be able to walk inside this one-of-a-kind WORKING computer, and "...see what it is doing, with flashing lights (and) whole room-fulls of gadgets ...all doing interesting tasks".

The Computer Museum which attracts close to one million visitors each year, boasts of such things as:

"A unique computer fashioned out of Tinker Toys and fishing line (that) plays World-class Tic Tac-Toe". Also sixty hands-on displays, including many "articial Intelligence (demos) and Robotics".

One of the artifacts displayed is the 'Whirlwind Computer', developed in 1951 by MIT. Because of it's size, it was loaded to be sent to a junk pile and was rescued by the museum in 1974.

The primary purpose of the museum is to erase the fear of computers that a major portion of civilization has and "...show all of the applications of personal computing, from music to art, to organizing your life, allocating your money, communications, and learning."

to have accomplished it's goal.

~~~~~~~~~~~~~

"Just as your body casts a shadow involuntarily, so you continually and involuntarily effect the lives of people around you by are actions". (anon)

#### FUN WITH PROGRAMMING

Try these quickies out:

```
10 ! ---LAZER---

### The CRACKER BARREL

June 1990

### Reaffirmation

In the tradition of the old West the miners, cowboys, and farmers met at the neighborhood general store after their daily chores had been completed. It was a place to tell stories, gossip at bit, but I believe mostly a place to share ideas. That is and will be the format of our meetin' place. you have anything to share, it is welcome here. The items presented here may not be directly related to the TI/994A, but will be of interest to people like us...intelligent, inquisitive, imaginative, good looking, etc. So kick up your feet and set a spell at the CRACKER BARREL.

#### SOVIET SURPRISE

Among all the other surprises to come out of Russia is the revelation, that in Dec.1989 the Soviets established the first computer bulletin board in the Soviet Union. And it is being besieged by calls from around the world.

It is not a technical marvel: it runs on 640K of memory on a 8Mhz (mega-hertz) XT with a 40 MB harddisk. It was set up in the "Estonian city of Tallinn, 50 miles across the Baltic Sea from Helsinki Finland." reports Preston Gralla in his column of the March issue of PC/Computer. "Despite a great deal of line noise, which makes communication with the board difficult." Gralla concedes, it maintains a, "window to the world. The board supports a heavy amount of local traffic and a fair amount of international messages. (Much of the board's business is done in English) English). The phone number? It is 0142-422-583. "You can't dial direct from the U.S.. You will have to bracch to a voice phone and get the A T & T operator to dial for you. The sysop is Jussi Pulkkinen Isokaarri.

### WHAT'S NEW ?

Apple Global Education (AGE) is helping to keep students and their teachers, "from over 22 countries into daily communication with each other through Macintosh computers connected to AppleLink." AppleLink runs through General Electric Information Service.

Events such as The California earthquake and the crash of the Berlin Wall are announced "...thru the first hand accounts of children in or near the effected areas". (Can you imagine how refreshing these accounts must be?)

It appears these will be the, 'Pen-pals' of the future!

### PRIVATE EYE:

The Syberspace Corp., in Norcross Georgia, is introducing a 61b laptop, the size of a normal keyboard but it contains a 200MB hard-drive, a 1.44MB (1 1/4 million) floppy, and a 16 Mhz processor. The screen(?) is a 2' PC which is to be suspended over one eye. Using a magnifying lens and a mirror assembly, the viewers see, "...what appears to be a 12', red on black screen as viewed from a distance of 2 feet." This information was found in the March issue of PC/Computing. It continues "(the screen)...provides a resolution of 720 by 280," which will provide a 25×80 display. The price in 1988 was \$5,000, but starter kits are \$495. (This info. thank to the article by Fredrick Paul).

### 

#### A QUICKIE

What are the 3 most frequently used street names in America??

### ERROR PROTOCALS:

Ever wonder how does the error checking work when sending or when receiving via xmodem, ymodem, or zmodem?

The sending station sends the information in groups (blocks) of data. To insure the data being received is the same as the data sent, it performs a math operation on each block. The operation it performs and the result is attached to the 'block' before sending it to the receiving station. This operation is called a Cyclical Redundancy Check (CRC).

At the receiving end, the CRC is separated from the block and the math operation is performed again. The two results are compared. If they match, an acknowledgement, (ACK) is returned to the sender. the two do not match, the block is refused and a Negative Acknowledgement (NAK) is returned to the sender, which must then re-send the block. A simply example of this type of routine might be:

1 : SAVE "DSK1.MY-CRC" 10 ! ---a sample block---20 BLOCK\$="HOW ARE YOU" 30 ! -- BLOCK\$ is down into ASCII value of each char. 40 FOR T=1 TO LEN(BLOCK\$) 50 A=ASC(SEG\$(BLOCK\$.T.1)) A+TOT=TOT 03 70 NEXT T 80 ! --check TOT with SENT--(the result of BLOCK\$ at the sending station) 90 IF TOT<>SENT THEN PRINT " NAK" :: GOTO 20 100 PRINT "ACK" 110 STOP

Below is a demo of a receiving station comparing several messages.

 30 L=5 :: CALL CLEAR 40 TITLE - " CYCLICAL REDUNDA NCY CHECK" 50 FOR J=1 TO 27 :: DISPLAY AT(4,J)SIZE(1):SEG\*(TITLE\*,J ,1):: NEXT J 60 DISPLAY AT(8,L): "by Chick De Marti" :: DISPLAY AT(24, 1): " [Hit <ANY> key to trans mitl" 70 CALL KEY(0,K,S):: IF S=0 THEN 60 ELSE CALL CLEAR **80** ! --BLOCK\$ is a "BLOCK" to be transmitted--90 FOR TRANS=1 TO 4 100 READ BLOCKS, REK 110 ! typical CRC procedure 120 FOR CHAR=1 TO LEN(BLOCK\$ 130 A=ASC(SEG\$(BLOCK\$,CHAR,1 140 TOT-TOT+A 150 NEXT CHAR here "TOT" is compared to "REK" (the results 170 ! at the receiving end). 180 DISPLAY AT(L,1): "Sent: " ;BLOCK\$;TOT 190 FOR DELAY=1 TO 750 :: NE XT DELAY! For effect only 200 DISPLAY AT(L+1,1): "Rec>: ";BLOCK\$,REK 210 IF TOTK > REK THEN DISPLAY AT(L+2,1)BEEP:"....NAK" EL SE GOTO 230 220 DISPLAY AT(23,4): "Block 3 -- Try No.2" :: GOTO 240 230 DISPLAY AT(L+2,1): "ACKno wleaed" 240 L=L+4 :: TOT=0 250 NEXT TRANS 260 DISPLAY AT(23,3): "Transm ission complete" 270 INPUT FINI\$ 280 END 290 DATA "How are you?",1090 "Try to call me",1264,"I'll call again",1315,"I'll call again,1316

I'm out of coffee, See you next month at the CRACKER BARREL.

HOW TO REMOVE THE COVER FROM THE P-BOX

By: R.J. Bieber - The Southern Nevada Users Group

Removing the cover from the P-box is a very example task. It involves nothing more than removing 15 acrews  $\Theta$  and then carefully sliding out the chassis assembly.

Remove all cards from the P-Box.

Remove 1 screw from each side of the cover.

Remove 7 screws from the bottom.

Turn the P-Box on its face (Protect the Power Switch)

Remove 6 screws from the back.

Carefully lift the chassis assembly out of the case. It should slide out easily. DON'T force it or you may break the plastic light tubes!!

If the chassis assembly doesn't come out easily, then check to be sure all of the cover screws have been removed and try again.

Once you have removed the P-Box cover you have easy access to the card connectors, power supply and cooling fan making for an easy cleaning job. You'd be suprised how much dust the fan sucks in over a period of just a few years. While you're at it why not replace the noisy fan with a quieter whisper type fan.

### TECHNOSPEAK ANSWERS By Earl Raguse

- 1. Birds of a feather flock together.
- Cleanliness is next to godliness.
- 3. Beauty is only skin deep.
- 4. You can't teach an old dog new tricks.
- 5. Don't cry over spilled milk.
- All that glitters is not gold.
- Where there's smoke there's fire.
- Beggars can't be choosers.
- 9. Virtue is its own reward.
- 10. Dead men tell no tales.
- People who live in glasss houses shouldn't throw stones.
- 12. All work and no play makes John a dull boy.
- 13. He who laughs last laughs best.
- 14. Nothing ventured nothing qained.
- 15. Sticks and stones will break my bones, but names will never harm me.
- 16. A rolling stone gathers little MOSS.

ANATOMY GUIZ ANSWERS By Earl Raguse

Here are ten 3 letter body part names.

(1) Toe (2) Leg (3) Hip

(4) Rib (5) Arm (6) Ear

(7) Eye (8) Jaw (9) Lip

(10) Gum

If you know more, let us know.

STYLE A LINE A TINYGRAM by Ed Machonis

TINYGRAM: A short program which can be typed in it's entirety on one screen without any program lines scrolling off the screen. Made popular, I believe, by Mike Stanfill of the Dallas TI Home Computer Group.

First let me make it clear that this is not a novelty program. It is a work horse, provided you have the work for it. What kind of work? Do you ever have to print just a line or two, such as a page header, an article or, a title for a picture or a data-base printout? A credit line for a reprinted newsletter article, etc.,etc. Further, would you like to print it in Expanded Compressed Italicized Double Strike Moderline If so, this program is type style? for you.

Don't let it's brevity fool you. You can use any of 128 type styles available on an Epson RX-80 % many compatibles...with line spacing and margin variations.

(Instructions follow the program)

1 ! \*\*\* STYLE A LINE \*\*\* a TINYGRAM by Ed Machonis QB-99ers, Bayside, NY 2 ! # WORD FUN ANSWERS By Earl Raguse

Please help by supplying statements appropriate for the blank numbers.

1 Wheel on a Unicycle 2 is What It Takes To Tango 3 Blind Mice (See How They Run) 4 Suits in a Card Deck 5 Digits in a Zip Code 6 is a Halt a Bakers Dozen - 1 Wonders of the World 8 Notes in a Musical Octave 9 Planets in the Solar System 10 Dimes in a Dollar 11 Players on a Football Team 12 Signs of the Zodiac 13 Cards in a Bridge Hand 14 Days in a Fortnight 15 is XV in Roman Numbers 16 Men on a Dead Man's Chest 17 is a Book by Mark Twain 18 Holes on a Golf Course 19 is One Less Than a Score 20 Nickels in a Dollar 21 is Age of Consent For Males 22-23 nothing 24 Black Birds Baked in a Pie 25 Year of a Silver Wedding Anniversary 26 Letters of the Alphbet 27 nothing 28 Days in February 29 Days in February in a Leap Year 30 Days Hath September 31 Days is What the Rest Have Except February 32 Degrees Farenheit at which Water Freezes 33-38 nothing 39 is thee Age of Jack Benny 40 Days and Nights of the Great Flood 41 is the Year of Pearl Harbor Attack 42 Gallons in a Barrel of Oil 43-44 nothing 45 is the Caliber of a Colt Forty Five Revolver 46-47 nothing 48 Cards in a Pinochle Deck 49 Seven Times Seven 50 Ways To Leave Your Lover 51 nothing 52 Weeks in a Year of the Gregorian Calendar 53 Cards in a Poker Deck With One Joker Missing 54 Cards in a Deck (with Jokers') 55-56 nothing 57 Heinz Varieties 64 Squares on a Checker Board 66 is the Route to get Your Kicks On 76 Trombones in the Big Parade 77 Sunset Strip 87 Four Score and Seven 88 Piano Keys 99 Bottles Of Beer On The Wall 100 Percentage Points in a Whole 101 Dalmations 200 Dollars for Passing Go in Monopoly

1000 Words that a Picture is Worth

1001 Arabian Nights

(Instructions for STYLE A LINE)

At the menu, it is always best to select "1" to clear the printer. If your printer does not support a master reset code turn it of & on to clear it.

Combine styles by successive selections. Select option "10" to input text.

To change type style, or do repeated printings of the same text, typing "zzz" or "ZZZ" will return you to the menu. Option "9" reprints the same text and styles can be changes as required. To input new text select option "10"

NOTE: When in the text mode, pressing ENTER with no text input will print a blank line.

Watch those commas in line 10 and the next to last data item is a lower case "L", not a "one"
