

77 MARCH

\*\*\*TEXAS INSTRUMENTS MIAMI COUNTY AREA USER'S GROUP\*\*\*

The second meeting of the user's group was held on February 25th. Greg Greenwald was elected President. Cindy Cattin was elected Secretary/treasurer and Keeper of the Software Library.

Many people have conflicting activities with Tuesdays, so it was decided to meet the SECOND TUESDAY and FOURTH WEDNESDAY at 7:00 PM. We hope this will allow those people who are interested to attend.

Dues have been established at ten dollars per address. Please have your dues to me by February 23rd. If you have not yet attended a meeting, you are welcome to attend twice before paying your dues.

We would like everyone to bring a list of their software to the next two meetings so I can establish a Software Library. I would like a list of modules also, so that anyone considering purchasing a module will have a chance to see it in operation if someone in the group owns one. When our disk system arrives Les and I will be putting the Software on a disk. When someone wants a copy they

will be expected to bring a tape or disk to us and we will then pull the software off of the disk. The disk will be travelling to each meeting.

Greg has generously offered to have the meetings in his home until further notice. We will be holding meetings only in homes that will accommodate the group. The other members may help by furnishing refreshments. Please do not feel obligated to hold meetings in your home if it is not large enough.

Next meeting is FEBRUARY 8th at Greg Greenwald's home. Greg's address is 937 ROSEWOOD DRIVE. That is located in Parkview Heights. For directions, Greg can be reached at 472-1282, or I can be reached at 473-3776.

The topic for discussion at the next meeting is "FILE HANDLING".

Hope to see everyone at the next meeting! Bring a TI friend!

Cindy Cattin

473-3776

PRESIDENT'S CORNER

As President I would like to take this opportunity to welcome each of you to the Miami County Area 99/4A User's Group. I look forward to an exciting and educational year for everyone. The experience of our membership is now quite varied. This wide cross section of owners should add vitality to our group through lively discussion.

The Texas Instruments Home Computer is a fantastic machine and one of our major projects this year will be to help everyone learn how to unlock the unique features this computer offers. Your 99/4A can be an excellent tool for advancing your children's education, helping you manage your household or small business and, of course, it plays fabulous arcade style games. Through presentations throughout the year we hope to increase everyone's level of knowledge. After all, trying something different is one of the most interesting facets of computer ownership.

I want to encourage each of you to actively recruit new members. You will be doing new owners a favor and will be helping to expand the services the User's Group can offer at the same time. If you know someone who is considering the purchase of a home computer, talk up the 99/4A. But don't talk down any other brand. Our goal should be to educate and inform so that prospective owners may make an intelligent decision. Let's leave the exaggerated claims and throat cutting to the sales people, they seem to do it well!

Speaking for all your officers, I can say we want this to be your User's Group. If you are not satisfied with the group's operation please feel free to say so. If you have any suggestions as to how we can improve the group please bring it to the attention of one of your officers. I assure you all suggestions will be considered. If you have any suggestions for a meeting program please contact the program committee. The program committee consists of: Tom Gill (chairman), Les Cattin and Jeff Bowen. I'm sure they will appreciate your suggestions.

In closing I would like to once again welcome you to the group and wish everyone HAPPY COMPUTING!

A handwritten signature in cursive script, appearing to read "Greg". The signature is written in dark ink and is located in the lower right quadrant of the page.
