

ELV 923729

This image shows a complex circuit board layout for part ELV 923729. The board is populated with various components, including two large integrated circuits (ICs) on the left side, several smaller ICs, and numerous discrete components like resistors and capacitors. The layout features a dense network of traces connecting these components. A large, dark rectangular area is present in the upper left quadrant. The board is enclosed in a rectangular frame with corner brackets.

ELV

This image shows a circuit board layout for part ELV 923730. The board features a prominent central IC with four circular mounting holes. To the right of this IC is a cluster of components, including several ICs and resistors. The layout is characterized by a clear arrangement of traces and components. The board is enclosed in a rectangular frame with corner brackets.
