

ELV
933830

This image shows the top layer of a printed circuit board (PCB) layout. The board is rectangular with four corner registration marks. The layout features a complex network of black conductive traces. A large, solid black area is located on the left side, likely representing a component footprint or a specific functional block. Numerous circular pads are distributed across the board, connected by thin and thick traces. The text 'ELV 933830' is printed in the upper right quadrant.
