

ELV
935892

This image shows a black and white layout of a circuit board. The board has a complex, irregular shape with several cutouts and a central rectangular area. It features numerous circular holes of varying sizes, some of which are connected to the board's conductive paths. The layout is symmetrical along a vertical axis. The text 'ELV' and '935892' is printed in the upper left quadrant. There are four corner registration marks, each consisting of an L-shaped line and a circle.

ELV
935891

This image shows a black and white layout of a circuit board, similar in design to the one above. It has the same overall shape and cutouts. The circular holes and their connections are arranged differently. The text 'ELV' and '935891' is printed in the upper left quadrant. There are four corner registration marks, each consisting of an L-shaped line and a circle.
