

## USB 2.0 > VGA Adapter

### Description

The USB 2.0 to VGA Adapter enables you to connect any VGA monitor, LCD, projector to your PC or notebook with the system requirement as below, without need of a second graphics card. The USB2.0 SVGA adapter can mirror and enlarge the display. You can use up to 6 monitors depending on the system support. An extra adapter is required for each monitor.

We would like to point out that this adapter is suitable for simple applications and thus cannot replace a graphic card.
